Products

1) HACARUS-X

HACARUS-X is AI package for healthcare and life science industry. The AI is based on our proprietary "sparse modeling" technology that can abstract unique features (or characteristics) from any given data set without requiring a large amount of training data, which is often considered as a bottleneck of deep learning based AI.

2) HACARUS Fit Platform

HACARUS Fit Platform is a collection of toolkits for healthcare and medical research. It consists of a user-facing smartphone app that can connect to any type of wearable and Bluetooth enabled devices, a cloud based backend system that can analyze vital/medical data collected from the app, and AI (HACARUS-X) based prediction model.

Message

*Any healthcare, life science, medical institution or company looking for a human-understandable AI solution and/or a toolkit for rapid proof-of-concept experiment.
Any ISV (Independent Software Vendor) looking for non-deep learning based AI that can complement its existing AI lineup.*
